

Meet School Uplift

This year, our school is participating in School Uplift, a program from TVA EnergyRight® and our local power company. While participating in School Uplift, we will reduce energy costs and make our classrooms and learning environment even better.

Get to know the ABCs of School Uplift.

Active energy training

We're learning to save money by taking energy-saving actions at school, like turning off the lights when we leave the room and unplugging charging devices when we're done. We can't wait to see our students try out these tips at home too!

Through workshops and other resources, our staff is also learning about ways to improve our school's energy efficiency, making our learning environment better for everyone.

Building community

Our school is one of over 100 schools participating in this year's School Uplift program. By working together to save energy, we can strengthen our communities!

Competitive and need-based grants

We'll also be eligible to compete for grants that will help us upgrade our facilities and improve the learning environment. By actively participating in School Uplift's activities throughout the year, we'll increase our likelihood of receiving a grant!

Ask your student(s) about what they've learned and what you can do to save energy at home. We can't wait to see how our collective actions can make a difference in our school and our community!
