Green Switch Program Guidelines
January 1, 2027

General Participation Requirements

- The Green Switch program ("**Program**") is designed to offer end-use customers the option to purchase renewable energy certificates, and/or blocks, from renewable energy generation sources including solar photovoltaic, wind turbines, low-impact hydro, and methane gas sources (which generation sources are collectively referred to as "**Green Power Sources**").
- Customers of Distributor who participate in the Program ("**Participants**") will enter appropriate arrangements with Distributor providing for the premium payment for 200 kWh block(s) of renewable energy ("**Energy Blocks**").
- There is no minimum Energy Block requirement to participate in the Program.
- Each Participant will pay a charge ("**Green Switch Program Charge**") equal to $2.00 for each 200-kWh Energy Block that the Participant commits to pay for each month.

Administration

- TVA will retire RECs associated with each Participant's Energy Block purchase, equal to the REC equivalent of the payment that is collected from the Participant.
- TVA will provide a one-time $4.00 credit to Distributor for each new Participant that enrolls in the Program. TVA will apply such credit(s) to Distributor's monthly wholesale bill for power and energy.
- TVA may publish information about the Participant's green power use and participation in the Program, but TVA will honor all written requests made by Participants to keep Participant information confidential to the extent permitted by law.
- TVA may promote and advertise the Program.
- TVA will review Energy Block pricing, resource mix, and Energy Block sizing for the Program annually. TVA will communicate any changes to Distributor at least 30 days prior to the effective date of the changes.
- TVA may, upon providing at least 30 days' written notice to Distributor, update or change any Program terms, conditions, guidelines, incentives, or requirements.
